Data Mining

LATEST SUBMISSION GRADE

100%

1. What is an example of a data reduction algorithm?

1 / 1 point

- ☐ Prior Variable Analysis.
- ☐ Cojoint Analysis.
- ☐ A/B Testing.
- ☒ Principal Component Analysis.

Correct

Correct.

✓ **Correct**
Correct.

2. After the data are appropriately processed, transformed, and stored, machine learning and non-parametric methods are a good starting point for data mining.

1 / 1 point

- ☒ False.
- ☐ True.

✓ **Correct**
Correct.

3. **In-sample forecast** is the process of formally evaluating the predictive capabilities of the models developed using observed data to see how effective the algorithms are in reproducing data.

1 / 1 point

- ☒ True
- ☐ False

✓ **Correct**
